Objective: Limit the distance for attaching controls to the mast and add side blocks

CURRENT

C.9.3 CONDITIONS FOR USE, MAST

- (g) Movements of the mast shall be restrained by fore and/or aft guys or mechanical restraint connected to the mast below the lower point, or blocks at deck level.

PROPOSAL

C.9.3 CONDITIONS FOR USE, MAST

- (g) Movements of the mast shall be restrained by fore and/or aft guys or mechanical restraint ~~connected~~ attached to the mast ~~below the lower point, or blocks at deck level.~~ not higher than 203mm from the deck level. Blocks of any material, may be added to both sides of the mast spar hole to limit the side movement of the mast.

Reasons:

Possibility of attaching controls to the mast higher than 203mm from the deck is removed. Also, blocks are permitted to prevent the side movements of the mast on the mast spar hole.

¹ Proposals can be made by the Board, Technical Committee, National Secretaries or 5 fleet captains up to 1st March.
